

Testimonials

Testimonials from our valued customers

I have had the pleasure of working with TNS Construction on 2 of my own personal residences and have been involved with TNS Construction on 2 other projects for friends. In my profession I have the opportunity to walk through and inspect a lot of houses, many of them newly constructed by TNS Construction. I am always impressed with the quality of the workmanship, the high level construction techniques utilized by TNS and the professionalism shown at the job site by TNS employees. Tommy Stevens aims to please and that he does very well. During the course of construction, changes to the floor plans or interior finish materials are inevitable. The whole crew is very easy to work with. They understand building a new house is a dream come true for most homeowners and will attempt to accommodate any request by the homeowner. Should I ever choose to build another house, TNS Construction will be my first call.

This was my first experience building a home and I was very unaware as to what the process was and the steps needed to start! TNS was highly recommended and I'm glad I chose them to build my first home. From start to finish Tommy and his crew were on top of everything and made things so easy for me. He always had the time to answer any questions and was always prompt when it came to any request. Being that I had almost no knowledge of the whole "house building" process, they took the time to explain and made sure that everything was to my satisfaction. Their extra efforts to make sure that all the "little" details were just right impressed me and I knew I had chosen the right Contractor :)

Tommy and his team were very patient with me and I want to thank everyone for their help and support! Although my home is not a " mansion ", it's perfect and I have had "many" compliments on it! Thank you Tommy, Shayna, Deanna and the whole crew of TNS Construction for helping me build my dream home!

Ms. Terri Aiwohi

We had our first home built in 2009. Having never built or even owned a house before, to say the task was daunting is an understatement. We spent weeks interviewing several contractors, talking to vendors and references, and one name kept coming up: TNS Construction. They had a reputation of doing good work, being fair, and very easy to work with. We decided to choose TNS to build our house and are we sure glad we did. From first meeting with them and throughout the whole building process, it was a pleasure to work with TNS. They gave us tips on how to build the best house for our budget, were extremely helpful in explaining the building process to us, and were always available to answer our questions. The reason we were so apprehensive in choosing a contractor in the first place was because of all the horror stories we've heard, that we've all heard, when dealing with a bad contractor. With TNS, there was no worry; it was like we all were a team working together focused on building our house, a house that was built well and ultimately finished two days ahead of schedule.

TNS Construction's workmanship is of high quality. The walls are straight, the foundation is solid, and the house just looks good. . Several friends and family that are in the construction business have commented on the level of workmanship and always ask who the contractor was. From making sure all the corners were square, down to beautiful built in shelves and window sills, every detail big and small received their attention. TNS takes pride in their projects and it shows.

But most important to us was their honesty. Being that we were new to the

process, there were situations where a lesser contractor could easily have cut corners and taken advantage of us, or outright ripped us off and we never would have known. But the people at TNS were always honest, true to their word, and made the entire process as transparent to us as possible.

We have been in our house several months now and are truly enjoying it.
Thank you very much Tommy, Shayna, and all the TNS crew!
